Summary

Hi, I am Arjun, a software engineer with 3 years of extensive experience in full-stack web development. I help businesses build digital solutions using PHP, Javascript, and MySQL. I am passionate about building scalable products that are valuable to users.

Professional Experience

Software Engineer at F1SoftInternational.com

Kathmandu, Nepal | Mar 2018 - Jun 2019

- Worked on the redevelopment of enterprise-based software for commercial banks which updated previous versions, fixed bugs and optimized to make it flexible and scalable in the long term.
- Applied Agile scrum development methodology, enabling the faster release of features and fixes. Started using Atlassian Confluence and Jira for project management.
- Researched and presented about TDD such as unit testing, e2e testing, and auto testing using Selenium tools which decreased the working load of QA engineers by 10%.
- Implemented Ci/CD deployment using Jenkins which delivered product backlogs consistently in collaboration with other developers.

Backend Engineer at Nyatapoli Technology Nepal

Kathmandu, Nepal | Oct 2016 - Mar 2018

- Developed and maintained software products, databases and API endpoints for enterprise and government organizations.
- Initiated, architected, and coded an office management system to automate internal tasks, making employee management more efficient by 40%.
- Collaborated with the development team to enhance database design, ensure data security and improve application performance.
- Designed and maintained REST APIs for efficient data communication between front-end and back-end systems.
